Block chain and housing register

- Register of housing company shares
  - Legislation in force from beginning of 2019
  - Owners of shares, liens and restrictions
- Traditional database implementation by NLS
  - Standard API's for all users

- Transaction system of apartments is implemented by private company
  - Based on block chain technology (R3 Corda)
  - NLS register acts like "oracle"
    - Standard API, NLS is not connected as native node in block chain

- Same services must be able to offer to all possible future implementations
