 - • Draft sent to the working group december 2018
 - • Sweden and Finland continue working on the report
 - • First draft at the first meeting
 - *Finalising the report at the second meeting*
 - Publishing of the report at Stora Chefsmötet in September 2019

Future services and data solutions

Workplan 2019: A task for each meeting in the LMWG – to discuss the list and keep it updated and also to exchange experiences. The list needs to be prioritized.

- Accessibility through platforms
- WFS 3.0, Vector tiles, 3D tiles, Geopackages
- Increased use of downloading services
- General webstandards
- Security issues when new combinations of data will be possible to make
- Linked data
- 3D/4D, BIM and City models, Indoor positioning
- New kinds of sensors collecting data
- Drones
- Machine learning
- AI
- Know-how as a service
- Data provider services (ie quality control)
- Maintenance of data models
- Services for printing in civil crises

2: ELS – common statement from the Nordic countries made during 2019

- Every member of the group prepares for next meeting (the situation in each country)
- Anders makes a presentation at the first meeting with the LMWG 2019.

Meeting dates 2019 for the Land Mapping working group, lunch-to-lunch meetings

Fewer physical meetings are planned for 2019

- 27 – 28 March, in Norway
- 2 – 3 October, in Sweden
